DIRECTIONS

- Approach people with small children
  - The questionnaire is tailored to that demographic, but it often works for others as well. People can take it as the questionnaire suits them, and it can be passed on to other people who can answer it without the assistance of a caretaker, and young child.
- You may deliver the questionnaire verbally or hand the respondent a form.
- If your site is in a busy area, you may consider making every 3rd person answer a sum score of 5, and so on. Additionally, you may ask people to complete the questionnaire when they pass by.
- Be sure to record the date when the questionnaires were collected and the questionnaire themselves.
